

**NEED TO KNOW? WANT TO KNOW? HOW TO FIND OUT?  
Dennis Lougheed A15 Z51W Chair**

Is there an undercurrent in your Club's atmosphere that you can't identify? Do you have members who don't speak up at meetings but you know have strong feelings about certain issues being discussed? Are there Club practices or policies on which you know there is a diversity of opinion but which members seem unwilling to openly discuss? Do you have members who aren't attending as frequently as they have in the past? Have you lost members and feel that you don't really know why? Do you wish you had a clearer understanding of all of the above? Do you wonder how you can get honest answers?

What follows is an example of a survey instrument you might adapt to suit your own needs and a description of how it might be used.

In order for this approach to reveal truly honest responses your members must be confident that their answers will remain anonymous. In that way they need not fear others taking offense, retaliation or further alienation. Having members take the survey instrument home and returning it anonymously to a sealed box can easily accomplish this. Once the surveys have been received the results can be tabulated for summary and reported back to the members for further discussion.

Ratings for each question can be averaged to get a sense of the overall club feeling and may as a result identify a Club wide issue. Inconsistency in the ratings on a particular item may also indicate a problem area. Individual ratings should be noted as well. If the ratings of a small group of members are significantly different from the majority you have identified another issue that needs addressing.

Discussion should be focused on how to resolve the issue in an agreed upon constructive manner. You may well find that in simply completing the survey and sharing its results the problem resolves itself simply because your members are now thinking about issues in a way they have not in the past and are now aware of the issue and how others are feeling about it.

Please give some thought as to how you might modify the survey contents to suit your own Club's needs. If we don't have the courage to ask ourselves these kinds of questions how can we ever be certain that there aren't hidden problems that hamper our ability to focus on the good works we all want to do?
